

C C Trustee Co., Limited 

China-Consulting Consortium (CCC) Development

Over the past two decades, thanks to the high level of trust and support given by our customers around the world, our professional team has continued to grow, expand and diversify. CCC has a group of qualified professionals with international experience, including accountants, auditors, tax advisor, lawyers, bankers, financial management and immigration experts. As always, our mission is to continue to enrich clients' product choices of services and provide them with quality and reliable, one-stop service.

The Trust Service

CCC has more than ten years of experience in setting up trusts for clients. In 2018, we were honored to have obtained a license in Hong Kong (licensed as a legal trustee). Many people may choose a trust primarily for taking care of family and friends, but the Trust can further help you manage property and taxation matters. So far, many of our clients have established Trusts in response to their needs.

Examples include, proper planning before emigrating to Europe, to avoid incurring capital gains tax and inheritance tax in Europe. After establishing a Trust for the client, the client assets in Hong Kong or elsewhere (including bank accounts and investment accounts) are legally owned by the Trust. Details in the Trust will not need to be reported to the European country where client will emigrate. This not only can protect the assets, but also ensures safe enjoyment of assets by family or friends in advance. In this age of rapid change, Trust is a wise choice.

The purpose & advantage of Trust

- To mitigate tax
- As an instrument for estate planning to avoid disruption on death
- To protect assets
- As a confidential way of holding assets
- To benefit charitable and non charitable purpose
